ABC-10X-S

Multi-Strain Spore Based Concentrate

GENERAL DESCRIPTION

ABC 10X -S is a liquid concentrate of specially selected multi-cultured bacterial strains which is combined with free enzymes, special surfactants, and performance additives under a proprietary stabilization process. These enzyme catalysts work synergistically for the fastest action available in a liquid digestant using nature's own cleaning agents.

ABC 10X -S contains a synergized blend of selectively chosen Bacillus organisms, complex enzymes, and special surfactants, which all of which has been selectively incorporated for our fastest liquid product available to accomplish accelerated degradation capabilities of organic compounds such as grease, fats, proteins, starch, sugars, and cellulose.

BACTERIAL COUNT:

ABC 10X- S has an undiluted bacterial count of 1 trillion cfu's per gallon.

DILUTION RATE:

1 gal of 10XS + 9 gal of H(2)0 = 10 gal of 1X (RTU)
This equation denotes, with a dilution ratio of 9:1, a bacterial count in finished product (ready to use) of 100 billion/gal.

Each order is batch certified for our customers safety and satisfaction. Bacterial count and Salmonella negative certifications are supplied with each order.

ABC 10X -S can provide you with the ability to economically develop a full line of specific or multi-purpose bacterial products.

ABC(S)...SERIES is also available in the following formats:
